## Press Release

### **New Ergonomic Solutions Group Structure in place**

Ergonomic Solutions, the market leading supplier of technology mounting solutions, primarily to the retail industry, have completed their ambitious restructuring programme. All design, manufacture, distribution and support operations for their core product range SpacePole® have been brought into a single group structure under the umbrella of Ergonomic Solutions International Limited. The new group employs over 80 people and revenues are expected to top €15 million in 2007.

Central to this restructuring was the acquisition of the manufacturing facility that produces SpacePole® which is now operating as a new subsidiary, Ergonomic Solutions Manufacturing A/S. This facility and the manufacturing staff, located in northern Denmark, was acquired from HD Design, which remains a major shareholder in Ergonomic Solutions International. The Group also comprises four regional sales and support companies, based in Denmark, France, Germany and the UK. In addition to its own sales companies, Ergonomic Solutions also has established distribution partners for the European and North American markets.

*Signing the new agreement from left to right is:  
Hans-Jørgen Dalum, Ian Dewar and Kieron Tonge.*

Group Chairman, Kieron Tonge, said "Our new and more streamlined structure enables us to deliver even higher levels of service to our partners and end-user customers, and provides an excellent platform for development and growth".

The day-to-day management of the Group will be led by its co-founding Director, Ian Dewar, who played an active role in the planning and implementation of the restructuring programme. "I am pleased to announce the appointments of Nick Kerridge and Jan Jacobsen as managers of our UK and Nordic sales companies, and Colin Phillips who has

taken over responsibility for the manufacturing company. These appointments will further strengthen the excellent management team already in place, fully capable of meeting the Company's ambitions" said Ian Dewar.
