Ergonomic Solutions International's position regarding RoHS

Tel: +44 (0) 1372 728872
Fax: +44 (0) 1372 726699
www.ergonomic-solutions.net

The European Union's directive 2002/95/EC on the "Restriction of Hazardous Substances Directive" (**RoHS**) was published on 13th February 2003. It controls the use of specified hazardous substances in electronic and electrical equipment sold in Europe from 1st July 2006. The materials specified are lead, mercury, cadmium, hexavalent chromium, and certain flame retardants use in plastics: polybrominated biphenyls (PBB) and polybrominated diphenyl ethers (PBDE).

Ergonomic Solutions International, as a provider of high quality technology mounting solutions based on poles, arms, peripheral plates, and connection joints together with their associated fixtures and fittings is committed to complying with the RoHS directive as a minimum standard within its environmental policy, and to fully support its customers in their compliance.

Ergonomic Solutions International confirms that each of its discreet products including but not limited to metals, welding, plastic parts, paint and packaging are fully compliant with the RoHS directive.

Ergonomic Solutions International does not intend to make any changes to part numbers or package labelling as a result of RoHS. This decision results from the fact that the vast majority of products have not required modification because they do not contain any of the restricted substances. The few products that have required modification have been altered without discernable change to product performance or characteristics.

Should any customer have concern regarding any product or would like further information on **Ergonomic Solutions International** and **RoHS** then please contact Colin Phillips at the following address.
